Adetokunbo Ademola Street, Victoria Island, Lagos.

9.00am - 6.00pm Daily

CONFERENCE INFORMATION

INTRODUCTION

The **LAGOS ARCHITECTS FORUM 2010** organized by the Nigerian Institute of Architects, Lagos State Chapter will hold from 28th – 30th April 2010, at the New Eko Expo Hall of the Eko Hotel & Suites, Victoria Island, Lagos. The theme this year, “**LAGOS: EVOLUTION FROM 3RD WORLD TO 1ST WORLD ECO-SUSTAINABLE MEGA CITY**” focuses on transforming the landscape of Lagos into a world class sustainable and vibrant city of cohesive communities.

The rapid urbanization of Lagos as a result of rural to urban migration has resulted in a city bursting at its seams. Horizontal spread cannot proffer a lasting solution, with the attendant high cost of energy required to achieve it, in terms of expanded infrastructure (roads, power, waste, drainage, transportation, etc.) and the resultant loss of natural green belts, agricultural land and the ecological balance of the environment.

There is need to evolve a more sustainable pattern, model of development and existence in Lagos State. The cities of tomorrow need to be denser with more concentrated centers of living, working and playing, that are more resource efficient and habitable for the urban population.

Key players in the Construction Industry are expected to showcase their products, services and areas of specialization with the specific aim of addressing the needs of the end users, and improving the quality and standards in this sector.

OBJECTIVES

- Bring together Professionals of the Construction Industry to discuss burning issues in the Industry
- Create an environment to showcase new technologies applicable to the Industry
- Serve as an opportunity for Architects to earn CPD Points
- Create networking opportunities for Professionals in the Industry
- Serve as a Policy Advocacy instrument / opportunity to Lagos State Government
- Create a learning and development platform for students in tertiary institutions (Schools of Architecture) in Lagos State

BENEFITS

PROFESSIONAL

- Learn from industry experts and case studies, local and international
- Update your skills and learn about current trends in design, development and construction industry
- Learn about best practices in sustainable development
- Understand critical issues affecting viable developments

COMMERCIAL

- Understand the current economic climate
- Position your business for the new wave of development opportunities and technology available
- Get leads to developing quality business models
- Opportunity to forge new partnerships and collaborative ventures
- The role of Government policy in urbanization, economic development and how it affects your business and developments
- Discover innovative methods of development within the current economic climate

GENERAL

- Meet over 2000 Architects and other Construction Industry Professionals
- Network with Architects, Developers and other key players in the industry
- Learn about the implication of population explosion on the construction industry
- Interaction between key players to harmonize individual strengths

TARGET PARTICIPANTS

- Architects in Private Practice, Academia, Civil Service, Financial Institutions & other Private Organizations
- Allied Professionals in the Construction Industry (Private Practice, Academia & Civil Service)
- Policy Makers and Government Agencies & Parastatals
- Venture Capitalists and Equity Investors
- Financial and Mortgage Institutions
- Real Estate Developers and Property Development Institutions
- Construction Companies
- Students of Architecture and Allied Professions in the Construction Industry Building Materials Manufacturers & Retailers

SPEAKERS

FMA ARCHITECTS LIMITED

FMA Architects Limited is an interdisciplinary Planning, Architecture and Interior Design Services Firm established in 1973. Its business delivery cuts across the different sectors of the industry including Government, Commerce, Education, etc.

With offices in two African countries (Nigeria and Botswana), it collaborates well with other organizations and has done well in this direction with Yost Grube Hall (YGH) in USA to deliver office buildings for Chevron Texaco Nigeria Limited.

Arc. Femi Majekodunmi founded FMA in Nigeria in 1973 and from that time has grown the firm into an inter-disciplinary practice. He is an internationally respected Architect and has held Professional Offices as President, Nigerian Institute of Architects, President, African Union of Architects and President, International Union of Architects; contributing to the development of Architectural Practice, locally and internationally. His professional membership cuts across several countries including (Britain, Zimbabwe, Bulgaria, Kenya, India, Botswana, Trinidad & Tobago, Republic of South Africa, USA (Hon.), Mexico (Hon.) and Spain (Hon.).

Today, FMA Architects Limited is managed by Arc. Roti Delano. He joined FMA in 1980 and became the Managing Partner in 1992.

Arc. Roti Delano holds a Master of Environmental Design (Architecture) from the University of Lagos. He is registered with ARCON and has held various leadership positions both at the local and national levels in the management of Architectural Practice in Nigeria. Arc. Roti Delano will speak at the conferences during LAF 2010.

TAN KHONG CHEW

Mr. K. C. Tan is primarily an Architect who has vast experience in Real Estate Development, Hospitality, Retail, Food & Beverages, Education, Social Enterprise and Agro Forestry.

He comes with such a very diverse background and exposure and as such is able to relate and speak us in a practical way, how a city like Lagos can successfully evolve into a sustainable 1st World Mega City.

Mr Tan's experience in real estate development cuts across various countries of the world and has grown from as little as USD 6m to as much as USD 60bn projects in a wide range and variety of projects covering: Malls, Housing, New Town Development, Bridges, Multipurpose Complexes, Hotels, Master Plan Development, Residential, Condominiums, Resorts & Golf Courses, etc.

He is a practical and hands-on Professional who will add great value in giving insights to practical ways of Lagos achieving a sustainable 1st World Mega City status.

GHK ARCHITECTS LIMITED

Godwin Hopwood Kuye Architects is an Architectural Firm founded on January 1st 1989, when Godwin & Hopwood Associates merged with Tunde Kuye and Associates; Tunde Kuye himself having been associated with Godwin & Hopwood since 1978. With an international office established in London in 1988, the company is highly computerised and is also involved in interior design.

Their approach to design conceptualization is inspired from both the natural landscape and the quality of the built environment.

GHK has been responsible for some very eco-

friendly 1st world type designs in Nigeria and beyond.

Arc. Tunde Kuye will speak at the conference on behalf of GHK Architects Limited.

TOM HAYNES

Mr. Tom Haynes, an Architect, a strategic innovator and futurist, is a passionate advocate for sustainable development. He speaks at international conferences on the subjects of green buildings, international sustainable built environment, sustainable housing, etc. and he is an advisor and trainer with a practical vision for driving strategic business growth through the "Business Case for Sustainability".

His work has taken him through leading Architectural Firms in Australia including Denton Coker Marchal among others. He currently oversees Create Innovation Pty Ltd. Australia which he founded. Within this company, Tom created the main product called "BRAIN STAMPEDE". Based on leading edge thinking inspired by biology, this system supports practical innovation towards sustainability.

Tom speaks at international conferences in Asia, Canada and USA. The value of his presence at LAF 2010 will be immense.

JAMES CUBITT ARCHITECTS

Alan Davies, (Dip Arch. MCD Planning, RIBA, MNIA), and Architect and Town Planner is the Managing Director of James Cubitt Architects, Nigeria. JCA is an international Architectural Firm with offices in London, Lagos and Ghana.

Alan started his career with the James Cubitts Group in London in 1980 after obtaining a Dip. Arch. from Leicester Polytechnic, UK in 1974 and Master of Civic Design from

Liverpool University UK, in 1979.

He moved to the Nigerian Office of the Company to work on the Master Plan of the University of Nigeria, Nsukka as a Town Planner. In 1988, he took up the role of Managing Director of James Cubitts Architects, Nigeria.

In the period that Alan has been the MD of JCA, the firm has continued to re-invent itself to remain relevant in the increasingly challenging and changing business terrain. JCA provides Architectural Consultancy, Planning, Project Management and Interior Design Services in Nigeria and neighbouring countries.

Alan's experience in Nigeria since 1988 is an excellent combination that will paint the right picture on how to progress Lagos from a 3rd World City to a 1st World Mega City.
